

TR6 1972 FOR SALE

\$37,000

Built for the US market she went directly to California from the UK as LHD with carburettors. Returning to Australia sometime around 2015 and undergoing a complete rebuild in South Australia she morphed into RHD, still with carburettors.

I purchased her in 2018 and have been an active participant in regular TSOA-WA meetings, touring locally from Perth on social days out. It has not been used for any competition events.

Touring from WA to the TSOA National Rally in Tanunda in 2021, she has travelled some 12,000km through South Australia, NSW and Victoria and run like a dream and returned an average of 8L /100km overall. Holds excellent oil pressure.

She has been serviced regularly in my ownership and I have a full photobook history passed on to me of the rebuild and records of servicing are up to date.

New Hood (zipper rear window); tonneau cover; new tyres: travelling boot bag; range of spares for travelling. underfloor heat / sound shielded..

Currently in Moss Vale NSW, to arrange a viewing, or for further information contact me
